

Data and Sentiment are Creating Mixed Messages

NOW AVAILABLE!

- **The TiO₂ Industry Encounters Difficulties, Challenges and Some Hope**
- **TiO₂ Value Chain HeatMap – January 2019**

As the new year begins, trade war issues, the European economy and political tensions in the Middle East show up in TiO₂ demand trade statistics. What are the positive steps Multinational producers are taking? How will pricing be affected by the economic uncertainties that prevail, particularly with the concern that Germany may be close to or already in recession? How is the Feedstocks forecast affected?

Recently recognized as “an excellent publication on the TiO₂ and Mineral Sands industry” by a global brand name in the information and technology industry, *Ti Observer™ Insights* provides TiPMC Consulting’s view on the total value chain.

Both this month’s editorial “*Data + Sentiment = Mixed Messages*” and the current *HeatMap* are a must read – based on analyses of the latest industry data, insights, hands-on industry experience, and reviews of financial data from the manufacturing leaders.

The latest Feedstocks Forecast is also available on our website at www.tipmcconsulting.com.
