TiO₂ Forecast: The Perfect Complement to our Bloomberg Webinar

We at TiPMC Consulting hope you joined us for our most recent webinar, sponsored by Bloomberg Intelligence. As we covered a number of critical topics, the five-year TiO₂ forecast provides our outlook in terms of the bottom line: *"Where does price settle for the global TiO₂ market through the current Pandemic, the recovery, and the rest of the first half of the 2020's."*

If you missed the Webinar, contact us for details of our presentation. We developed our Pricing Forecast around these key elements:

- Where are the key TiO₂ consuming countries in terms of their public health and their economies, and which matter the most to global TiO₂ producers?
- Why is North America becoming increasingly important to global producers, and which diagnostics are critical in determining TiO₂ demand?
- What does the econometrics developed by Robert Fry Economics suggest about how TiO₂ demand responds post-COVID-19?
- How has feedstocks impacted costs and Chinese growth? Now is Lomon Billions vision of their future taking shape, and who has the most to lose?
- Where is global and regional price headed under the various scenarios?

Only an in-depth understanding of the dynamics can provide a clear forecast of pricing based on potential scenarios. Readers can follow the news, and follow our predictive path on the development of TiO₂ price.

Our Subscribers and VIP Members get the most unique insight on the industry and stay a step ahead of everyone else. Our partnership with Robert Fry Economics LLC provides groundbreaking data that digs deep into the nature of TiO₂ demand, and provides never before detailed analytics.

Interested in learning more about our subscription and VIP Membership? Visit our website or contact us directly. We can prepare the perfect package to meet your needs.
